ADITYA VERMA

(602) 582-3165 • adityavrmawork@gmail.com • adivrma.com • linkedin.com/adityavrma

Software engineer focused on AI products, full-stack systems, and rapid product development. Built AI-powered job discovery, expense management, and community platforms used by real users. Passionate about shipping quickly, learning aggressively, and solving problems from scratch.

EDUCATION

Bachelor of Science Computer Science May 2027
Arizona State University, Tempe, AZ 3.50 GPA
Scholarship: New American University ($54,000 Merit Award)
Leadership: Judge and Mentor, Sunhacks Hacktoberfest for 100+ students (ASU Hackathon)
Relevant Coursework: Data Structures & Algorithms, Database Systems, Artificial Intelligence Systems, Software Engineering, Machine Learning

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, C#, HTML, JavaScript, Typescript
Frameworks & Tools: Git, GitHub, React.js, Next.js, Node.js, CSS, DSA, Tailwind CSS, HuggingFace, Fast APIs, REST APIs, Tailscale, .NET
Machine Learning: PyTorch, TensorFlow, ML pipelines, Model Inference, LLMs, RAG, Vector Databases, Scikit-Learn
Artificial Intelligence: Claude Code, Codex, Cursor, MCP, Agents, Agentic AI, Prompt Engineering
Backend Development: Database Design, Supabase, Distributed Systems, SQL, PostgreSQL, Server-Side Rendering, MongoDB, ASP.NET Core
Cloud & DevOps: AWS (EC2, S3, Lambda, IAM), Docker, CI/CD, Azure
Mobile: Swift, Kotlin, React Native, Flutter, iOS Development, Android Development
Platforms: Linux, Windows, MacOS

WORK EXPERIENCE

Software Researcher & Developer, The Difference Engine, ASU, Mesa, AZ (Remote) Oct 2026 – Present
• Shipped **6+ prototypes** for **10+ Distinguished Innovation Fellows** using **React and AWS serverless**, cutting concept-to-demo time from **4 weeks to 1**.
• Synthesized **50+ research papers and datasets** into **8 data visualizations** that shaped Fellow projects, presented to **20+ faculty, Fellows, and external partners**.
• Built **CI/CD pipelines** with automated testing on AWS, reducing deployment time **70%**, and used AI tools to speed up research and documentation by **~40%**.

AI Engineer, Northern Watch Services Inc. (TimeGem.Press), Tempe, AZ Aug 2026 – Present
• Built **TimeGem.Press**, a full-stack **Shopify** platform using **HTML, CSS, JavaScript and REST APIs**, aggregating **5,000+ articles** from **100+ sources**. .
• Engineered **AI/NLP pipelines** and **API ingestion workflows** processing **250+ items/day**, cutting manual work **70%** and raising publishing efficiency **65%**. .
• Built **iOS and Android apps** with **Swift, Kotlin, Java, React Native & Flutter**, delivering real-time feeds and push notifications to **300+ users**.

AI Developer, NewWave Behavior Consultation × ASU AI Society, Tempe, AZ Aug 2026 – Present
• Built a **React clinical AI platform** on **local LLMs**, scoring therapy notes across **5 rubric domains** with **80% target clinician agreement**.
• Implemented **role-based access control, encrypted API calls, and audit logging** aligned with **NIST AI RMF 1.0 and HIPAA**.
• Shipped a **supervisor dashboard** with quality scoring, error analytics, and **human-in-the-loop review**, cutting review time **40%**.

Forward Deployed Engineer Intern, Haleon, London, UK (Remote) May 2025 – Aug 2025
• Built **Employee Brain**, a **RAG-based** onboarding platform that cut manual handover time **~40%** and new-hire ramp-up **~50%**.
• Engineered the full pipeline (**chunking, embeddings, hybrid retrieval, etc**) with permission-aware access control, reaching an **~85% helpful-answer rate** in testing.
• Deployed a **Next.js** chat frontend with citations and audit logging on **Haleon's Azure**, scaling from a one-person pilot to **3+ knowledge bases**.

Virtual Reality Simulation Assistant (SW III), College of Health Solutions, Phoenix, AZ Aug 2024 – Dec 2024
• Built **C++ simulation** modules in the SimX VR engine, improving physics and scene-loading performance by **35%.**

PROJECTS

AI Mesh: Distributed GPU inference for local LLMs, Personal Project July 2026 – Present
• Built a distributed inference platform **pooling GPU memory across peer machines**, sharding transformer layers to run **32B models on 12GB consumer card**s.
• Implemented **gRPC peer coordination** with dynamic layer assignment and failure recovery, **sustaining 30 tokens/sec across 4 machines**.

Nowline: Voice AI Assistant for Students, Personal Project Oct 2026 – Present
• Built a **voice-first AI agent IOS app** pairing **on-device speech recognition** with **Gemini calling** to reschedule tasks from **notification replies** in **under 1s p50**.
• Engineered a **deterministic scheduler in Swift** with **capacity-aware deadline allocation** and **iCal diffing** to auto-replan around **Canvas due-date changes**.

SmallSQL: Open-Source Text-to-SQL Harness, Hackathon Project Oct 2026 – Oct 2026
• Built an open-source harness that lifts a 4B open-weight model's SQL accuracy from **50% to 90%** on Snowflake data using schema grounding, validation, and retries.
• Shipped a **React + FastAPI** demo comparing bare vs. harness results with a live retry timeline, **built in 4 hours with Snowflake CoCo.**

Stealth: AI Job Radar (TryStealth.org), Personal Project May 2026 – Aug 2026
• Built a full-stack AI job platform with **1,000+ waitlisted users** using **Next.js, TypeScript, and Supabase**, scraping **2,000+ career pages** via **Playwright**.
• Engineered **semantic job matching** and **AI resume generation**, boosting **ATS keyword alignment 50–70%**, plus a **Chrome extension** for in-page tailoring.
